

Hard RAG benchmark: current system state

100 runs across 10 hard scientific tasks; error bars show repeat variability where applicable.

Overall quality

0.756

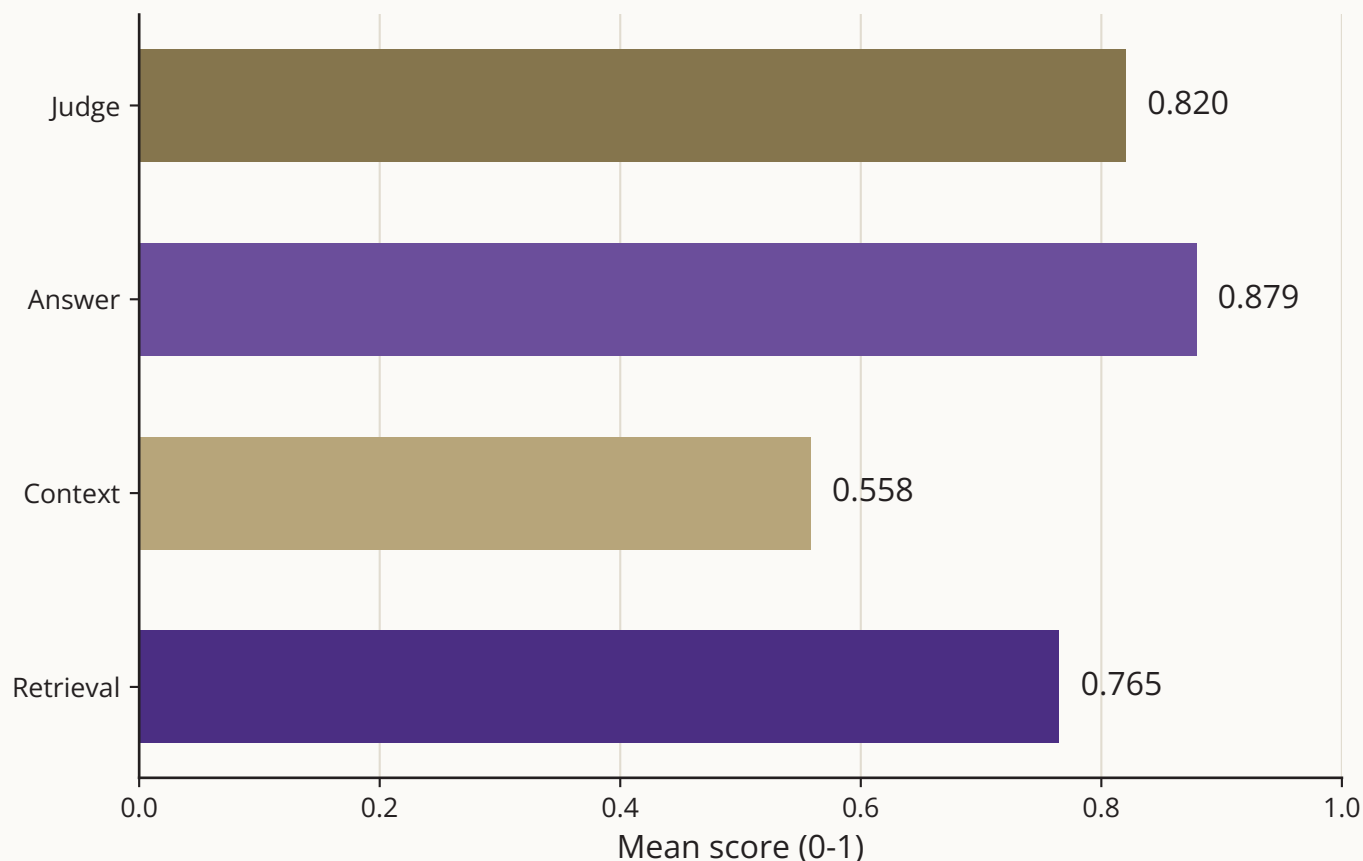

+/- 0.031 95% CI

Primary bottleneck

Context assembly

Context score is the lowest layer mean,
while answer behavior remains comparatively strong.

Pipeline layer scores

Timing: answer p50/p95 15.6s/29.3s; judge p50/p95 11.4s/18.1s
